Ayala Drive to re-open south of Easton Street

Construction crews have finished the connection of the Cactus Channel storm drain system across Ayala Drive, south of Easton Street. This will allow Ayala to re-open to drivers the afternoon of August 18 or the morning of August 19.

Ayala has been closed south of Easton since June 9 to allow workers to build a connection from the end of the storm drain channel to the catch basin.

The channel now is about 90-95% complete. Some graffiti abatement, additional fencing and paving of the access road are required, as well as the final connection to city storm drain systems. This portion of the Route 210 project is expected to be complete by the end of September.

Crews from Riverside Construction have been building the connection from the end of the Cactus Channel storm drain system to the catch basin located off Ayala, south of Easton.

SANBAG to seek bids for work in San Bernardino

Advertising for bids is expected to start later this month for bridge and storm drain construction on Route 210 in San Bernardino.

The contract will include building bridges at State and Highland, retrofitting and widening existing bridges and constructing the State Street storm drain, sound walls and local street improvements.

Bid packages for the San Bernardino work, known as Segment 11, will be available at the Rialto Field Office. Watch the Opportunities section of the SANBAG website, sanbag.ca.gov, for bid information.

Advertising started earlier this month for 210 mainline work (excavation and paving) between Linden Avenue and Interstate 215. Bids for this mainline work are due September 29. A construction contract likely will be awarded on October 6.

Plan ahead: I-15 work may impact travel on Route 210

Caltrans is preparing to rehabilitate heavily traveled pavement on Interstate 15 this fall, which may impact travel times on Route 210. Lane closures will be in effect on I-15 from September 13 to November 18 during this "around the clock" construction effort.

Work will extend from Sierra Avenue in Fontana to the I-15/I-215 junction in Devore. Traffic delays are expected, so drivers are advised to allow extra time when traveling near this area.

The lane closures also may impact the Route 210 construction zone through Rialto, as motorists seek alternate routes. Caltrans is recommending that drivers use Interstate 10 and Interstate 215 as suggested alternate routes. For more info, visit the Caltrans website at dot.ca.gov/dist8.
